Founder-led sessions, not a call center

Education first. No credit-repair contract required.

The problem

They never taught us the game.

Most people learn about credit and money by getting hurt by them — a denied application, a collections call, a rate that made no sense at the time. Generic advice treats every situation the same, and yours isn't the same as your neighbor's. It isn't even the same as it was two years ago.

- Sent to a call center that reads from a script.
- Told to "dispute everything" and hope something sticks.
- Given advice for credit with nothing for funding or building forward.

Four levels. One Blueprint.

The order isn't arbitrary — each level has to hold before the next one works.
