

GWOP UNIVERSITY

FRESHMAN STUDIES

COURSE NOTE 01

CREDIT FOUNDATIONS

KNOW YOUR CREDIT PROFILE

Before strategy comes clarity. This course note introduces the first GWOP framework for seeing your credit profile as an organized financial record.

GWOP 101

FRESHMAN / FOUNDATION

MODULE

01

OUTCOME

Credit Snapshot + three priority moves

WHAT THEY NEVER TAUGHT US.

ACTION > KNOWLEDGE

THE BRIEF

WHAT THIS MODULE IS BUILT TO DO.

Credit can feel complicated when every account, balance, status, and concern is competing for attention. This module gives the student one starting point: organize the profile before deciding on the strategy.

BY THE END

01 **SEE** the four pieces of the profile

02 **ORGANIZE** accounts into one view

03 **PRIORITIZE** what needs attention first

04 **ACT** on three defined next moves

STUDENT OUTPUT

A completed Credit Snapshot + 3 Priority Moves

THE IDEA

YOUR CREDIT PROFILE IS A FINANCIAL RECORD.

Don't begin with panic. Don't begin with assumptions. Begin with what is actually being reported.

01	ACCOUNT	Who is reporting?
02	BALANCE / LIMIT	What is owed?
03	STATUS	How is it reported?
04	NEXT ACTION	What happens now?

GWOP PRINCIPLE

Clarity comes before strategy.

READ THE RECORD

FOUR QUESTIONS. ONE CLEARER PICTURE.

REMEMBER

The snapshot is not a verdict. It is a working record that helps you decide what to look at next.

01

ACCOUNT

Who is reporting?

Start with the name attached to the account. The goal is to know exactly which creditor or account you are reviewing.

02

BALANCE / LIMIT

What is owed?

Record the balance and, where applicable, the available limit so the account can be viewed in context.

03

STATUS

How is it reported?

Note the reported status. Do not guess what it means - capture what is shown so it can be reviewed accurately.

04

NEXT ACTION

What happens now?

Choose a practical next step: review, verify, organize, monitor, pay, or seek additional guidance.

SEE IT IN PRACTICE

A FICTIONAL SNAPSHOT

This example is for teaching only. It shows how a student can organize information before choosing priorities.

ACCOUNT	BALANCE / LIMIT	STATUS	POSSIBLE NEXT ACTION
Everyday Card	\$1,850 / \$2,000	Current	Review utilization and payment plan
Retail Account	\$420 / \$1,000	Current	Monitor and keep organized
Collection A	\$690	Collection	Verify reporting details before deciding next step

HOW GWOP THINKS ABOUT PRIORITY

Priority is not the same as panic. Start with the item that is both important and actionable, then document why it comes first.

Example priority order: **1 Review utilization** **2 Verify collection details** **3 Maintain organized records**

YOUR WORKING PAGE

BUILD YOUR CREDIT SNAPSHOT

Put every account into one view. Do not solve everything here. Make the profile visible enough to choose what comes first.

CREDITOR / ACCOUNT	BALANCE / LIMIT	STATUS	NEXT ACTION

FIRST ORGANIZE. THEN PRIORITIZE.

FROM RECORD TO PRIORITY

WHAT DESERVES ATTENTION FIRST?

Use your completed snapshot. Select three items that deserve attention and write one reason for each.

1

PRIORITY

WHY IT COMES FIRST

2

PRIORITY

WHY IT COMES FIRST

3

PRIORITY

WHY IT COMES FIRST

QUICK CHECK

Is this important, actionable, and supported by what is actually in your snapshot?

THE WORK

MY NEXT 3 MOVES.

A lesson only matters when it changes what you do next.

1

ACTION

WHY THIS COMES FIRST

2

ACTION

WHY THIS COMES FIRST

3

ACTION

WHY THIS COMES FIRST

MODULE CHECK

NEXT / MODULE 02

Can I explain my profile? Can I name my priorities? Do I know my next three moves?

Credit Reports & Reporting
